

HIKING ROUTE ALONG THE SEASHORE AND COAST

Welcome to Slītere!

In the Slītere National Park, except for restricted areas, you may walk freely through it to look for plants, animals and landscapes, to pick mushrooms and berries, to go swimming (except at Kolkastrags, where it is dangerous), to get a suntan, to ride a bike or a boat. While doing it, let's respect the nature values!

The territory of the Slītere National Park has a sandy beach that is around 40 kilometres long and is appropriate for short hikes or ones that take several days. There are no insurmountable obstacles for people on foot between Melsnīls and Sīkrags. When planning your route, remember that the average distance which one can cover on foot in one hour is between four (moderate pace) and six (rapid pace) kilometres.

Here are two tables which show the distance in kilometres between major populated areas. This will allow you to plan a route that is in line with your abilities and your interests.

Distance (km) between villages along the **Baltic Sea** coastline between **Kolka and Sīkrags**

	Kolka	Vaide	Saunags	Pitragi	Košrags	Mazirbe	Sīkrags
Kolka	0	9	12	15	17	20	26
Vaide	9	0	3	5	7,5	10	17
Saunags	12	3	0	2	5	8	14
Pitragi	15	5	2	0	2	5	11
Košrags	17	7,5	5	2	0	3	9
Mazirbe	20	10	8	5	3	0	6
Sīkrags	26	17	14	11	9	6	0

Distance (km) between villages along the **Gulf of Riga** coastline between **Kolka and Melsnīls**

	Kolka	Ēvaži	Aizklāņi	Melsnīls
Kolka	0	9	10,5	12,5
Ēvaži	9	0	1,5	3,5
Aizklāņi	10,5	1,5	0	2
Melsnīls	12,5	3,5	2	0

Plan a circular route which leads back to the point of origin. To make the route more interesting, you can walk along the Kolka-Mazirbe-Sīkrags route in the Slītere National Park. It passes through small Livon villages and lovely pine forests with lots of natural elements including impressive dunes. Remember that this is a longer route than the one which runs along the seashore. For instance, the distance between Košrags and Vaide is 7.5 km along the seashore, while the bike route is around 9 km long. Add the 2 km from the sea to the aforementioned villages, and the overall route will be around 18 kilometres in length.

The village centres are as far as one kilometre from the sea.

- Hikers can also have other options:
- Correlate your route with the bus that travels between Mazirbe and Kolka so that you can return by bus (just remember that it will take some time to get to the bus stop);
 - In some cases you can find accommodations owned by someone who will pick you up at the end of your route;
 - Break up into two groups and go in opposite directions, exchanging car keys at the middle if you have left cars at both ends;
 - If bikes can be rented at your final destination, then you can return to your starting point by bike.

- Here are a few hiking routes:
- Mazirbe-Vaide
 - Vaide-Kolkastrags
 - Sīkrags-Kolkastrags (two days, spending the night at Košrags or Vaide)
 - Melsnīls-Kolka

The Slītere National Park (established in 1999 as a strict nature reserve) is known, with good reason, as an open-air museum which shows the historical development of the Baltic Sea. Nowadays evidence of geological events is seen in the Blue Hills of Slītere, which stand 20 to 30 metres high above what was the shore of the Baltic lake of ice 10,000 years ago. The Stiebrī hills were former 8,000 or 9,000 years ago, while the Littorina Sea formed Europe's largest set of dune ramparts and damp hollows between those ramparts. This occurred between 4,000 and 7,000 years ago. The gentle climate of Northern Kurzeme is the reason why so many rare plants are found in the park – some 860 in all including Common Yew (*Taxus baccata*) and Baltic Ivy (*Hedera helix* var. *baltica*). Of certain value in the preservation of these treasures was the Soviet military machine, which has left behind army bases and other military objects in the area. The presence of the military meant that the area of what is now the Slītere National Park remained largely undisturbed for 50 years. The park includes one of the most popular tourist destinations in Latvia – the Cape of Kolka, which is visited by more than 50,000 travellers each year. During the spring migration of birds, tens of thousands of birds fly over the cape within one hour. Along the shore of the Baltic Sea is the so-called Livonian coast, which stretches from Kolka to Sīkrags and Oviši. Fishing villages and other cultural objects established by the world's smallest ethnic minority, the Livonians, can be found here. Tourists will enjoy interesting four nature trails, bicycling routes, viewing tower, and the Slītere lighthouse which is open for visitors.
